

Mapping the Brain: An Introduction to Connectomics

Progress Report: Your Project Title

Your name

January 13, 2015

1 Summary

Brief overview of the status of the project. Are you meeting your goals? What hurdles have perhaps slowed things down, prevented you from doing so? What findings or tools have enabled you to accelerate your timeline? Pretend this is for a "boss," so be honest but also write in a way that makes you look good in either light.

2 Updated Goals

Has your scope or of the project changed/been refined at all? If so, how? Again, be concise and explain how whatever changes have been made are a good thing (this wonderful balance of truth and selling yourself is difficult to achieve, but good to practice).

3 Updated Timeline

Has your timeline changed? How are you for meeting your deadlines? Is there anything that could help you along in achieving your goal?
